

I clime

- 1 a alignment tool for aligning and holding a row of shingles while workers are busy fastening them to the roof.

A molded elongated rectangular straight edge to receive shingles on the front base with a rib rising vertical at ninety degrees angle.

- 2 A cable with 3/8" beads at five inch intervals.

The cables support the alignment tool at accurate intervals. The are snaped in the front of the alignment tool and anchored to the peak of the roof
